Aluminum Socket Bits (For power tools)

6.35mm

Ideal for fastening scaffolding clamps, assembling cable racks, and fastening wingbolts and other bolts and nuts.

Super Lightweight Aluminum
Weighs about 60% of steel. There is little impact when starting, therefore fastening proceeds smoothly.

No Damage to Bolts
Made of aluminum alloy and designed for face-to-face contact, the socket does not damage bolts or nuts.

Color-Coded Sizes
Affixed with color-coded labels so that size can be identified at a glance
